Moore's Modern Methods Ltd., London

To repeat order state **Feint**, Size 5" x 8"

M42 Lime Kiln Hill Quarry, Mells. Pleistocene Bone Fissure  
M43 Sandford Hill Surface Flint Site. Probably Mesolithic  
M44 Great Oone's Hole, Cheddar

## VIII

## SUBDIVISIONS

- .0 Topography, geology, formations in caves (e.g. stalactites), sections of deposits, plans and maps of sites. Plans and maps are sometimes given the subdivision .01
- .1 Human remains
  - .11 Skull including upper and lower jaws
  - .12 Teeth not in the jaws
  - .13 Pectoral girdle and upper limbs
  - .14 Pelvic girdle and lower limbs
  - .15 Vertebral column

[In practice, where there may be relatively few specimens, it is usual to ignore the subdivisions except for .02 for isolated human teeth.]
- .2 Vertebrate remains (Subdivisions as for human).
- .3 Invertebrates
- .4 Vegetable matter
- .5 Artifacts of stone
- .6 Artifacts of bone, ivory and antler and horn and shell
- .7 Pottery and glass

- .8 Metal
- .9 Miscellaneous

SUBDIVISIONS USED FOR SOME SITES.\*

e.g. Aveline's Hole, Read's Cavern

- .1 Human remains (subdivisions as above) (but for Aveline's teeth are M1-11)  
not M1-12)
- .2 Animal remains (subdivisions as above)
- .3 Artifacts of stone
- .4 Artifacts of bone and ~~antler~~ Bronze
- .5 ~~Bronze~~ Iron
- .6 ~~Iron~~ Bone
- .7 Antler
- .8 Pottery
- .9 Miscellaneous

\* Includes Aveline's Hole, Rowbarrow Cavern, Read's Cavern, Goatchurch Cave, Sun Hole, King Arthur's Cave

In this catalogue individual human teeth have been numbered under the subdivision of M.I.11

Vertebral column under M.I.12

Pectoral girdle (upper limb etc) M.I.13

Pelvic " (lower limb etc) M.I.14

Sundry human or probably human M.I.15

7/7/72

1968 or 1969 U.B.S.S. collection of 2x2 in. slides stolen  
Some have been replaced ~~by~~ from collection of Dr. H.  
Taylor. His catalogue references are given, e.g.  $\frac{M.I.}{T.1A}$

= Burrington Comb & Aveline's Hole from Book of Ages.  
and  $\frac{M.I.}{T.10}$  = Aveline's Hole, interior, looking  
towards mouth.

H.T. at 7/7/72 still holds his negs. (Transferred  
to U.B.S.S. 1973)

## M1 AVELINE'S HOLE

## CATALOGUE SUB-DIVISIONS

[ The numbering is applicable to only Aveline's Hole, Ead's Cavern and Rowberrow Cavern, M1, M2 and M3. The catalogues systems were subsequently changed. Only the divisions used for Aveline's Hole are listed here as there is no metal work or pottery from this Late Upper Palaeolithic-Mesolithic site]

- |      |   |     |  |
|------|---|-----|--|
| M1.1 | Human remains                             | .11 | Head including single teeth                          |
| .2   | Animal remains (Vertebrates)              | .12 | Trunk  |
| .3   | Flint and other stone artifacts           | .13 | Pectoral girdle and limb                             |

| .9   | Miscellaneous                             |     |  |

## M1 AVELINE'S HOLE

Burrington Combe

Somerset.

O.S. 6 inch to 1 mile sheet 18

Nat. Grid Ref. ST476588.

An Upper Palaeolithic Station with late Creswellian  
flint industry and an extensive fauna.

## CATALOGUE.

Many of the original catalogue numbers exist on specimens. The system used varies slightly from the one in general use in 1954. In view of this the subdivisions are given below.

Many of the specimens bear the working party number, in Roman numerals, on which they were found but as all the records have been destroyed in the blitz on Bristol no useful purpose would be served by including them in the catalogue.

Where slides are of a series of objects the letter "S" follows the numerator as to give all the catalogue numbers of the specimens figured would not be practicable.

• 0	General (photos, maps etc.)	[see p. 3	• 5	Brongze (nil for Aveline's)
• 1	Human Remains	for Aveline's]	• 6	Iron (nil for Aveline's)
• 2	Animal Remains		• 7	Artefacts of <del>Home &amp; Antler</del>
• 3	Artefacts of Stone		• 8	Pottery (nil for Aveline's)
• 4	" " Bone and antler		• 9	Miscellaneous

On loan to Brit. Mus. D. G. de G. Sieveking  
about Easter 1971 - photos also sent Returned 27.1.98.

Human, Humerus. Upper 2/3rds of shaft with condylar surface missing. The general surface of the bone has suffered considerably from weathering which has caused much of the smooth surface layer to peel off. The whole bone is covered with a variety of cuts some of which look like rodent teeth marks. They are most common and arranged in groups along the natural ridges and are probably cut marks made with graters particularly as some show minor ridges in the hollows indicating that more than one stroke of the implement was used to make them. Some of the larger marks may be tooth marks. Close to the nutrient

Moore's Modern Methods Ltd., London

Do repeat order, state Feint, size 5" x 8"

Dear Sieveking,

Nov. 16th 1971.

Here at long last are the photographs of the carved human humerus from Aveline's Hole. The negative numbers are:-  
KT, 28, 29, 1971.

There is no doubt about the "tectiform design" but it is possible that some of the other markings are due to gnawing by rodents. The exact form of the grooves is rather against this.

Yours sincerely

  
E.K. Tratman
