Gough's New Cave.

REFERENCES

This is the present show cave. In Jan.-Feb. 1959 further excavations were made under the arch of the entrance and inwards to just past the Cave Mast Rift, on left going in. Various finds were made in the cave earth and breccia basal portion. (See Donovan 1955. "The Pleistocene deposits at Gough's Cave, Cheddar, including an Account of Recent Excavations". P.U.B.S.S. 7(2):76-99. The area here concerned is just inside "Iron Gates" of

Donovan (fig 12) and the position covered by the letter "B" in same fig. It corresponds to lower part of breccia. At the entrance some material was recovered from fine silt, flood silt, deposited on bed rock at lip of cave mouth.

The material was presented to U.B.S.S. by the Management of Gough's Cave. It included a number of newly debossed patinated flint blades and flakes. The patination of the flints from this cave

REFERENCES

Series of 1/1 plate negatives of scenes in this cave. All taken by the late J.H. Savory in 1934. Some were used to illustrate "Cheddar - Its Gorge and Caves" by H.E. Balch, 1935 (John Wright). Many of the negatives are in poor condition 1975. The prints were also used to make photographs on post cards. Nowadays superseded by colour transparencies.
