

M 18 THE SLITTER
(Goughin Lane, Cheddar)

M 18

Location. Store

When circa 1957 the talus slope known as

THE SLITTER

was dug away a number of human bones were found. No record of stratification was made. The material was presented to U.B.S.S. by Gough's Cave management.

A brief account was published in PUBSS 1955 7(2) 110-113 "Some Human jaws and Teeth from 'The Slitter' Cheddar. The schedule pp 112/113 states the relative data and, so, no catalogue sheets have been prepared.
